

Certbot automatic renewal

Test the renewal manually

Test the renewal process manually with:

```
sudo certbot renew --dry-run
```

Set automatic renewal

Enable a systemd timer:

```
sudo systemctl enable --now certbot.timer
```

Test the timer

Check status with:

```
systemctl list-timers | grep certbot
```

You should see something like:

| NEXT | LEFT | LAST | PASSED | UNIT | ACTIVATES |
|-------------------------|---------|-------------------------|--------------|---------------|-----------------|
| Thu 2025-05-08 16:31:03 | 6h left | Thu 2025-05-08 07:13:12 | 2h 58min ago | certbot.timer | certbot.service |
