

Installation

We followed this Installation Guide on Youtube:

[How to install Bookstack on Proxmox Ubuntu.](#)

Lxc Container

We created a lxc Container for Bookstack by using this script in the shell of the desired Node:

```
bash -c "$(wget -qLO - https://github.com/tteck/Proxmox/raw/main/ct/ubuntu.sh)"
```

We used advances Settings and changed:

- Distribution: Ubuntu - Jammy - Unpriviledged
- Diskspace: 20GB
- Ram: 3072MiB

Bookstack

And installed Bookstack by using this script:

```
bash -c "$(wget -qLO - https://raw.githubusercontent.com/BookStackApp/devops/main/scripts/installation-ubuntu-22.04.sh)"
```

We have to set the IP Address.
